

medical vacuum filters

FEATURES

- designed to eliminate solid, liquid and bacterial contamination from medical vacuum systems
- 17 models with connections from ¼" to 3" NPT and rated flows from 2 to 156 scfm
- modular design allows close coupling of filters to simplify installation and maintenance
- housing manufactured from cast aluminum alloy providing enhanced strength and feature an E-Coat™ finish for optimum corrosion protection
- unique design provides maximum filtration performance while minimizing pressure drop for optimum energy efficiency
- drop fit element engages the bowl to prevent vibration, improving stability and drainage
- applications include dental, medical and veterinary

complete package

manual valve and sterilizable glass drain flask are included as standard

unique element design

constructed with an oleophobic borosilicate microfiber media with an open cell reticulated foam prefilter
